

Setting up your new Tracker

Step 1: Activate the Sim card

We have already installed in the tracker for you and fitted it to your new lawn tractor.

Please visit <https://www.giffgaff.com/activate> and follow the instructions, the activation code is printed on a plastic card attached to your invoice.

Once you have activated the SIM card you will need to add £10 credit to the account to complete the setup.

Now make a note of the **phone number** associated with the new Sim Card.

Step 2: Activate the Tracker

1. Save the new phone number in your smart phone with a name like "Tracker"

Send the following text messages IN ORDER to the tracker (leaving 30 seconds between each TEXT).

(2) Admin123456 (space) your own mobile number eg. (Admin123456 07XXXXXXX)

(3) Sleep123456 off

(4) Begin123456

(5) G123456# (It is essential that the "G" is a capital and the numbers follow without any spaces.)

After a short period of time (10 seconds – 3 minutes) the tracker should have responded with its location.

DONE 😊

If the tracker does not respond, or if the location is blank, ensure the vehicle is not too close to an obstruction such as a brick wall and send G123456# again.

Whenever you want to track the Lawn Tractor just text **G123456#** to the number saved as Tracker in your phone
